

## Discoverer 10G connection instructions

The new version of Discoverer reports (10G) has some new connection related screens.

### Steps to create a new Discoverer connection

This needs to be done only one time for each database (e.g. prd1, niku, vitlp, mcirqry). If you ever clear your browser cookies you will need to re-create the connection.

1. Launch Discoverer plus (<https://disc2.mdch.state.mi.us:4445/discoverer/plus>).
2. Replace the existing favorite or shortcut with this new URL.
3. The Connect to Discoverer Plus page is displayed.

4. Click Create Connection button to display the Create New Connection page, where you store the login details for a new Discoverer connection.

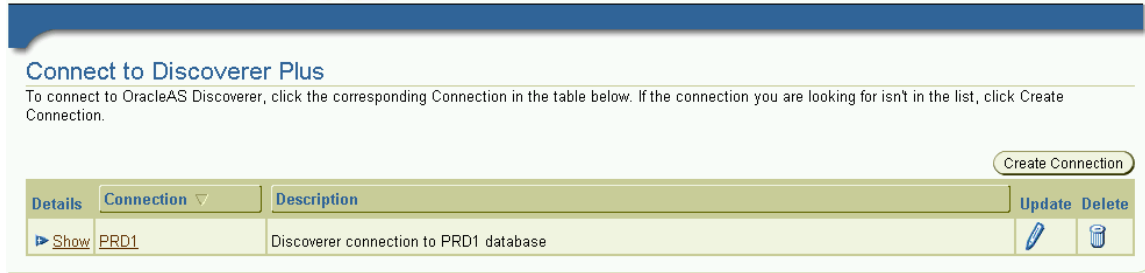

- Enter a connection name by which you want to identify the new connection into the **Connection Name** field. Use the table below to determine the connection name based on the application access.

#	Database	Applications	Connection Name
1	MCIRQRY	MCIR Query	MCIRQRY
1	PRD1	Administrative Tribunal ,Contract Tracking, CSHCS, CVSC, DD Grants, Gross Adjustments, MSA Pay, MOMS, OBRA, ProcRef MA Transportation, LC Determination Prior Auth	PRD1
2	VITLP	TMA Plus, Birth Registry	VITLP
3	PBC2	MBCIS	PBC2

# Discoverer 10G connection instructions

**Note: Only one connection is required for each database.**

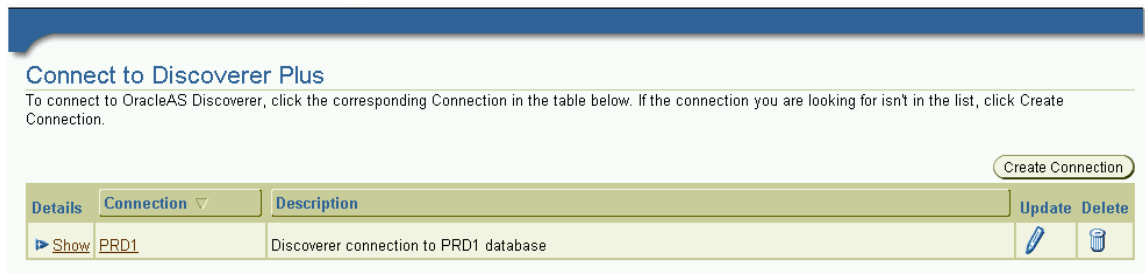

- (optional) Enter a description of the connection in the **Connection Description** field.
- Select the language that you want to use from the **Locale** drop down list. (English United States)
- Specify the user name, password, and database details for the connection that you will use. This information is same as what you used in the old version of discoverer.
- Click Apply to save the connection details will bring the following screen

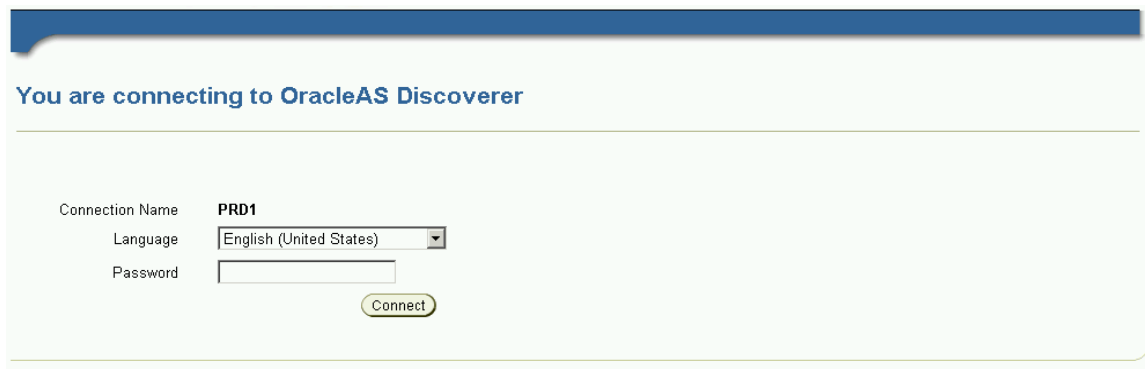

To create subsequent connections to other databases, follow the above steps 1 to 4 .

## Steps to start using Discoverer

- Launch discoverer plus (<https://disc2.mdch.state.mi.us:4445/discoverer/plus> ).
- The Connect to Discoverer Plus page is displayed. The new connection that has been created is included in the list of connections.

- click the new connection name (MCIRQRY) which is in the **Connection** list , will bring the following screen

- Enter the password and click connect.
