

Future Vaccine Need Report

MCIR/SIRS now provides a Future Vaccine Need Report to forecast those children needing immunizations prior to December 31st.

At the request of schools, this report was designed to be used in the spring for fifth graders to help prepare for the next school year's sixth grade report. Students who are 10 years of age will need additional vaccines after their 11th birthday. The vaccines that are listed are the vaccines required by school rules, there may also be additional recommended vaccines that the students need from their healthcare provider.

Additionally this report could be used for assessing other student's future vaccines needs that you may have on your roster but may not be in the current report period. Students who are in the current report period or the previous two periods may be included in this report. The user must choose the specific report period or may choose "All" to get a report for all students from the current period and the previous two report periods.

The preschool/childcare Future Vaccine Need Report will only report on students less than six years of age and only for the vaccines required for preschool/childcare requirements.

The Differences between the Future Vaccine Need Report and the Letters to Parents Report:

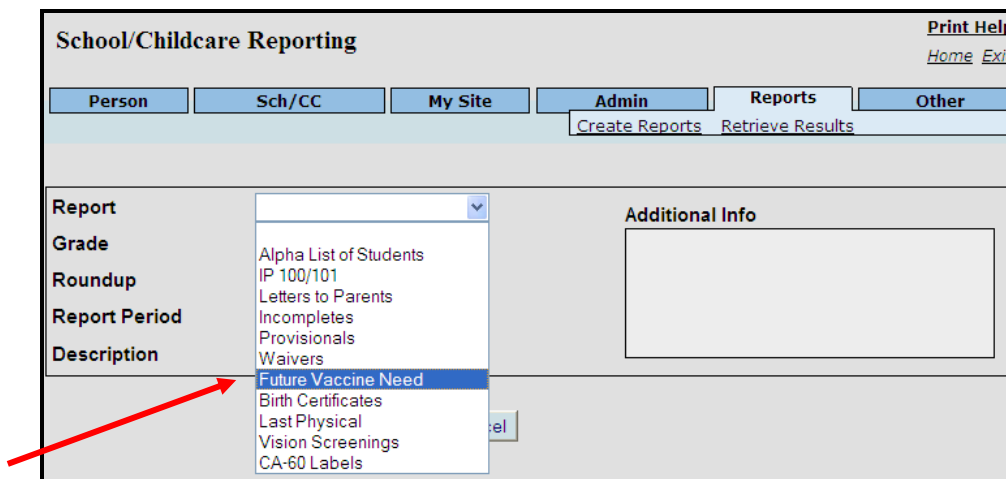

The Future Vaccine Need Report can be used at anytime. This report will give you a letter and a list of students who will need vaccines up until December 31st of the calendar year.

Running the Future Vaccine Need Report will not cause individual records to be reassessed.

The Letters to Parents Report gives you a letter for each student who is incomplete on the date that you run the report.

To Use the Future Need Report:

- 1) Log in and go to your site. Under "Reports" click on "Create Reports".
- 2) From the Reports Menu, choose "Future Vaccine Need".

- 3) Next choose your criteria: Grade, Roundup (included or excluded), and the reporting period. You may also fill in the Description to help identify the report later. Click “Submit”. You will get a pop-up window that will ask you to approve the criteria, click “OK”.

- 4) Go to your Reports Tab, click on “Retrieve Results”. This will bring you back to your report menu, click on Retrieve Results and you will see your report in the reports menu. Click on the word “Report”

Description	User	Target Dt	Status
Future Vaccine Need report		07/30/2011	Report is ready. Report

- 5) The Future Vaccine letters to Parents and a list of all students with future vaccine need prior to December 31st will come up. The letters will be followed by a list of the children with letters and another report of those that had an invalid address. To print, click on the Printer Icon in the upper left hand corner. The list will provide a list of students with dose due dates and those listed with an invalid address.
- 6) The letter will appear similar to the “Incomplete” letter for parents, however this letter indicates immunizations needed **Now** (overdue) or by the individual child’s assessment and birth date by the end of the year.

To the parent or guardian of Mary Jane Sunshine:

Michigan Public Health Code requires all students be immunized against vaccine preventable diseases to attend
Your school name here

According to our records your child needs the following immunizations:

- Tdap as of 10/10/2011
- Polio as of NOW
- MMR as of NOW
- Hepatitis B as of NOW
- Varicella as of NOW
- Meningococcal Conjugate as of 10/10/2011

Contact your doctor, your healthcare provider, or your county health department to make an appointment to receive these vaccines when they are due. Ask your healthcare provider or health department to see if you are eligible for no or low-cost vaccines for your child.

List of Immunizations on File							
Vaccine Series	Dose#1	Dose#2	Dose#3	Dose#4	Dose#5	Dose#6	Dose#7
No immunizations given							

***This immunization has not been verified by a healthcare provider. This immunization information was generated from a school or childcare report. Please review your own records to ensure accurate information regarding your child's immunizations. Encourage your healthcare provider to enter all immunizations from their medical record into the Michigan Care Improvement Registry (MCIR).**

Sincerely,

Queen Bee
