

## Process to follow when a MCIR HL7 Production Status site moves to a new EHR Product

- MCIR production status does not change if the new EHR is a MCIR Approved Product.
- If the new EHR product is not recorded on the MCIR Approved Vendor List, the site will need to be moved back to Onboarding Status until the EHR is approved by MCIR:  
[https://www.mcir.org/wp-content/uploads/2014/09/Approved\\_MCIR\\_HL7\\_EHR\\_Vendors\\_List.pdf](https://www.mcir.org/wp-content/uploads/2014/09/Approved_MCIR_HL7_EHR_Vendors_List.pdf)
- New EHR should never submit TEST messages during the transition with a Production Status site.
- Site staff are responsible to ensure all vaccines get entered in MCIR during the changeover period.
- Site needs to report to [MDHHS-MU-MCIRHelp@michigan.gov](mailto:MDHHS-MU-MCIRHelp@michigan.gov):
  - Name of new EHR product.
  - Transition date.
- There is nothing else MCIR or Regions need to do unless the site or vendor report an issue.
